About The Cover

This year's special edition of Digest depicts agricultural stability thru continued partnership of NIA and our farmers as well as value for culture along with modernization effort. The cover displays a name 'Prinsa', an old name for dam, which letters formed with blue 'watery-like' design illustrating the lifeblood of irrigation – Water.

Large part of the cover is a diamond-shaped structure catering bits and pieces of images portraying NIA, an old dam, a modern dam, and a farmer harvesting his yield.

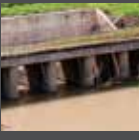

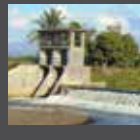

The diamond symbol is constructed from a series of triangles, of which each combination possesses its own representations and meanings. With NIA on the upper part of the diamond, the agency is acknowledging their responsibility in providing sustainable and efficient irrigation systems in the country. The left and right images show the commitment of NIA in constructing more irrigation structures started since the early years and how the agency is striving to promote modernized design and dependable structure for long term support.

Truly, the thing that fuels all the efforts of NIA to construct and operate irrigation systems boils down to our Filipino farmers – represented in the last part of the diamond symbol. They are the reason why the agency is keeping on its track despite challenges, unfavorable circumstances, and setbacks. They are the one giving significance to the very existence of NIA.

As the parts of the diamond remain intact we can see a stronger and stable agricultural foundation ahead.

MIMAROPA		81	200		Caraga
Bicol Region		101			

Preface

Irrigation remains the key component of agriculture in the Philippines. It serves as the foundation of a genuine and bountiful harvest which directly impacts the lives of Filipino farmers. The principles of managing the water for irrigation play an important role in harnessing its efficiency to serve the country's rich agricultural lands.

Realizing the need, the National Irrigation Administration (NIA) together with its unswerving heart of service continually committed to support our Filipino farmers to attain a rice self-sufficient nation.

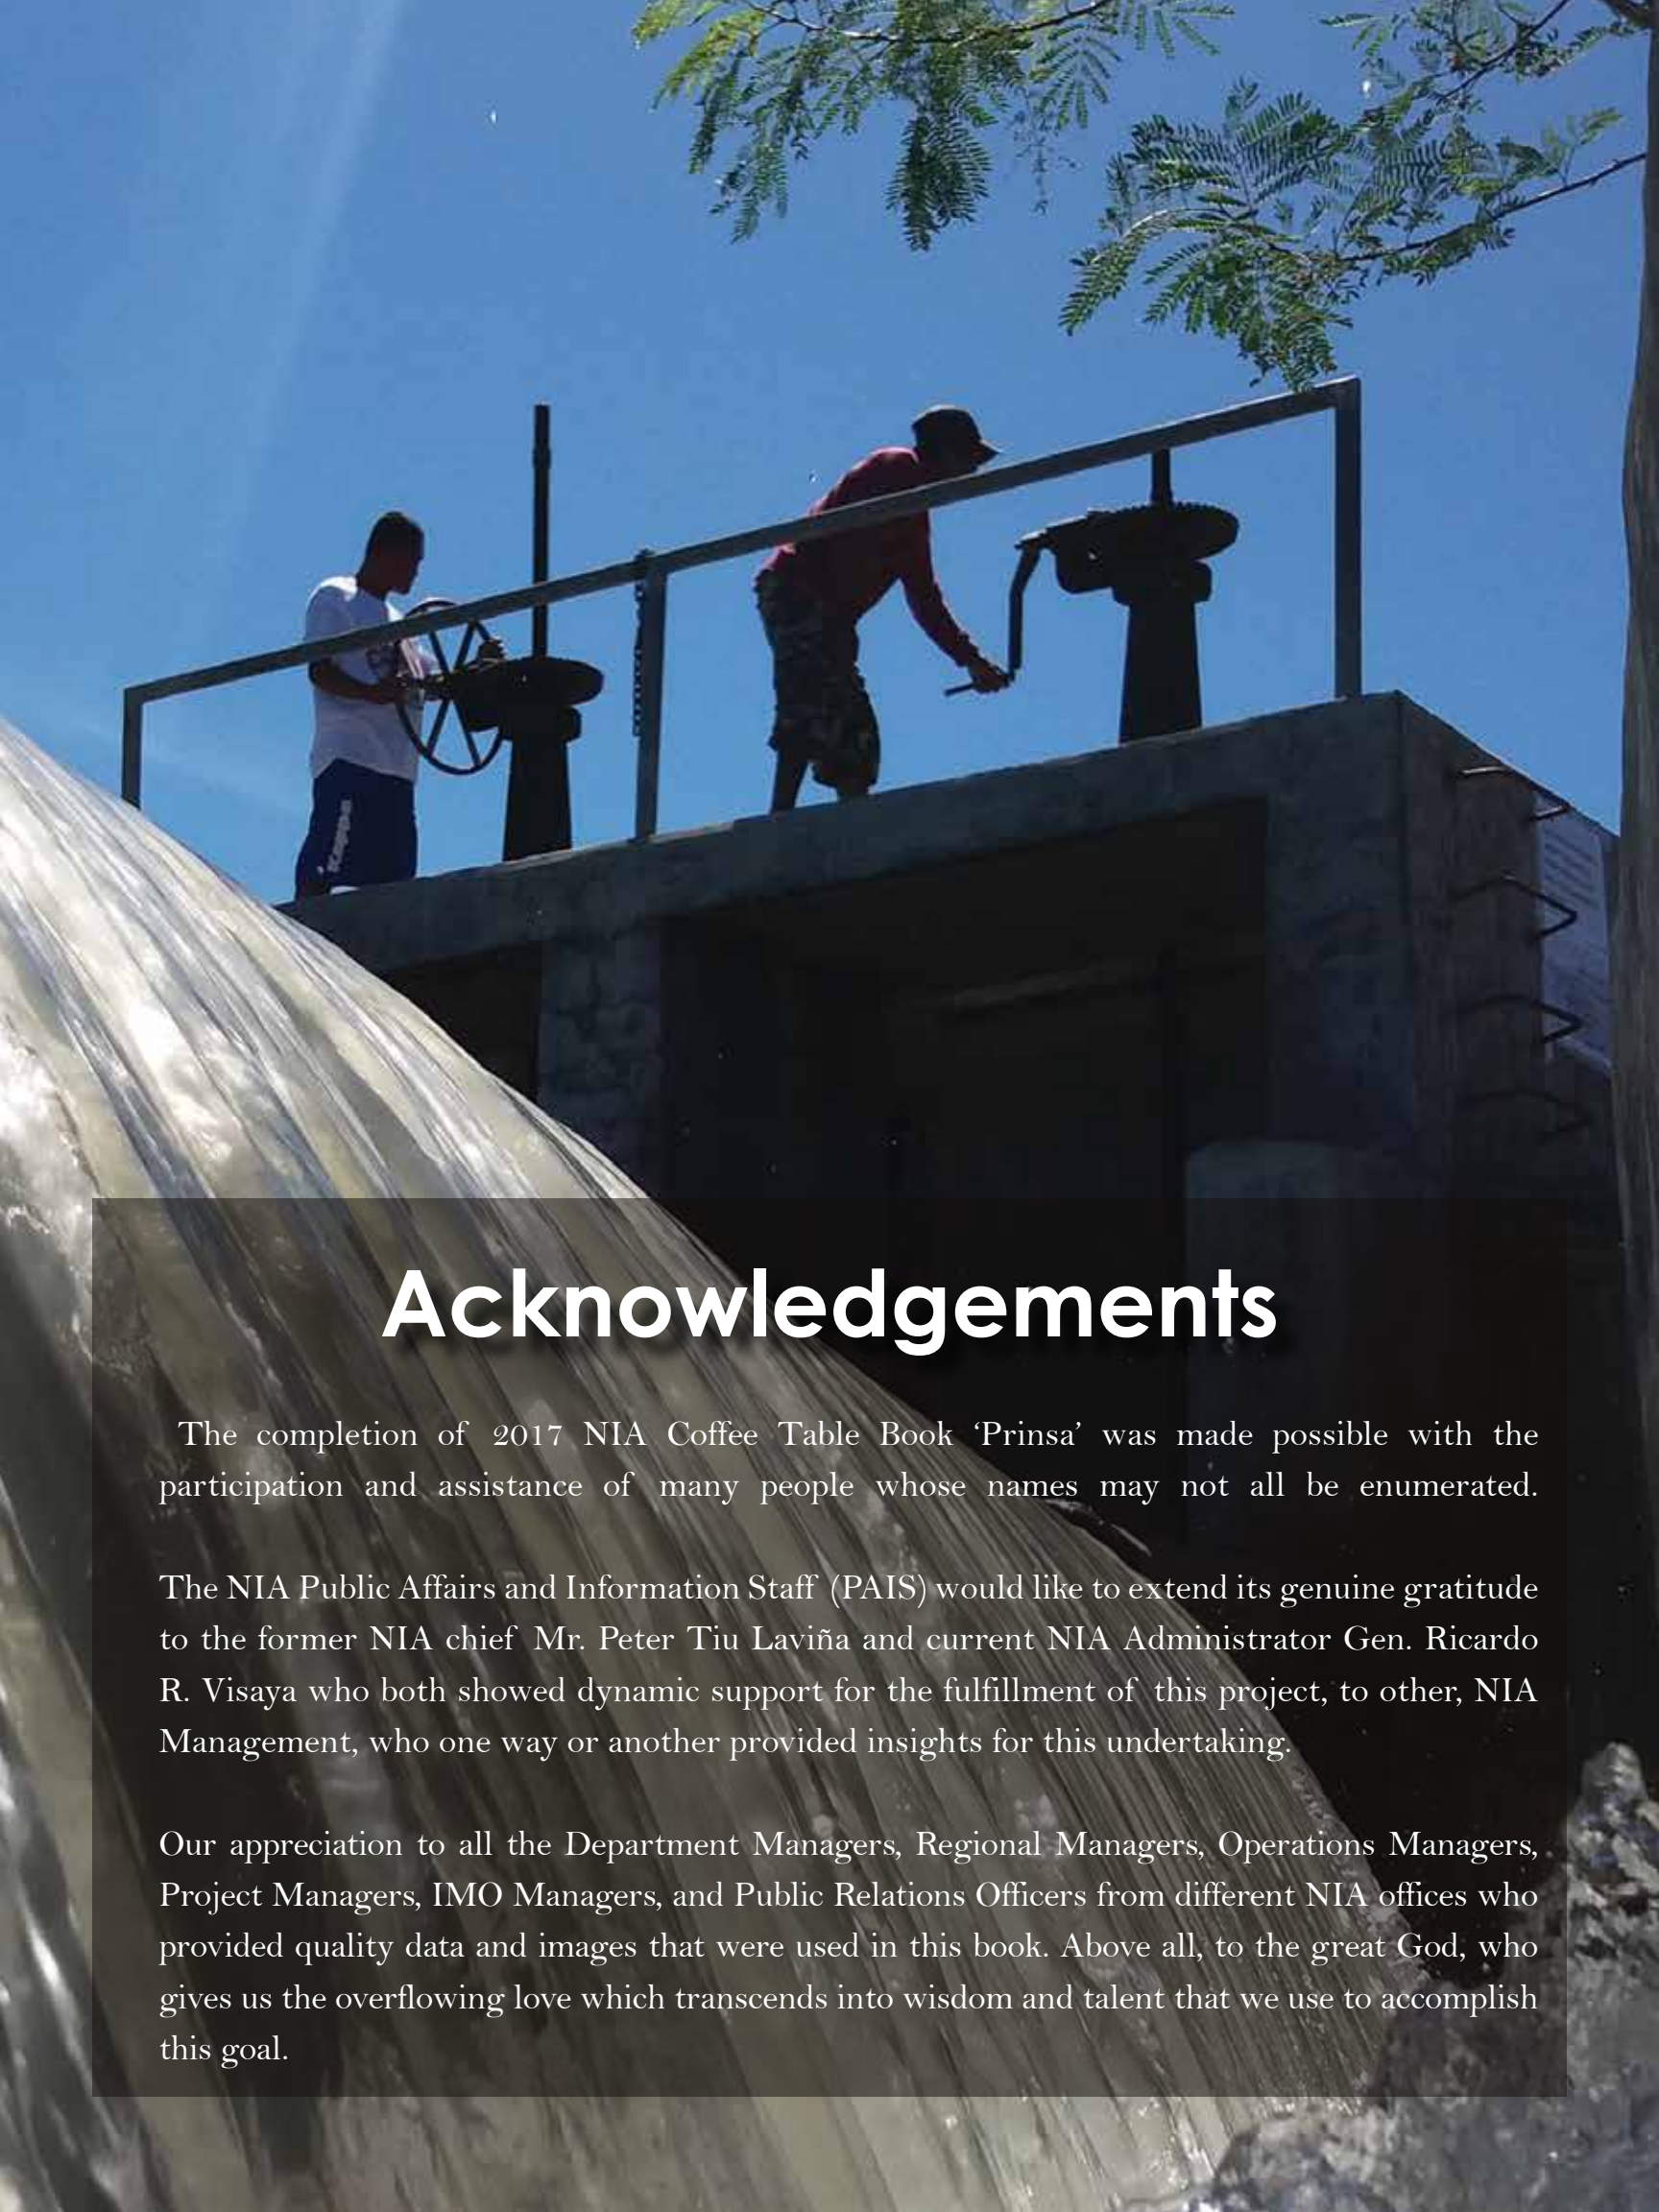

"Prinsa", a tagalog word for dam serves as a channel of concerted effort and passion in developing and constructing irrigation systems all over the country; an expression of hard work Filipino technical ingenuity and devotion in transforming the image of agriculture into an active component of the country's emerging economy.

As a basin of memories, this book contains images and information about the existing irrigation systems – both National Irrigation System (NIS) and Communal Irrigation System (CIS). It covers array of 'facts and figures' from service areas to farmer beneficiaries, from completion date to planted crops.

This book showcases what were achieved and challenges in the years to come. It gives us rays of hope for a secure and stable future.

Acknowledgements

The completion of 2017 NIA Coffee Table Book 'Prinsa' was made possible with the participation and assistance of many people whose names may not all be enumerated.

The NIA Public Affairs and Information Staff (PAIS) would like to extend its genuine gratitude to the former NIA chief Mr. Peter Tiu Laviña and current NIA Administrator Gen. Ricardo R. Visaya who both showed dynamic support for the fulfillment of this project, to other, NIA Management, who one way or another provided insights for this undertaking.

Our appreciation to all the Department Managers, Regional Managers, Operations Managers, Project Managers, IMO Managers, and Public Relations Officers from different NIA offices who provided quality data and images that were used in this book. Above all, to the great God, who gives us the overflowing love which transcends into wisdom and talent that we use to accomplish this goal.

VISION

By 2020, NIA is a professional and efficient irrigation Agency contributing to the inclusive growth of the country and in the improvement of the farmers' quality of life.

MISSION

To construct, operate and maintain irrigation systems consistent with integrated water resource management principles to improve agricultural productivity and increase farmers' income.

CORE VALUES

Commitment
Integrity
Professionalism

QUALITY POLICY

We are committed to provide an efficient, effective, and sustainable irrigation services aimed towards the highest satisfaction of the Filipino farmers contributing to the country's inclusive economic growth.

We shall strive for the attainment of our strategic themes of Technical and Operational Excellence, and Good Governance through Partnership with the farmers and other stakeholders.

We shall remain dedicated to the core values of Commitment, Integrity and Professionalism, to continually improve the NIA's Quality Management System.

"Ang NIA at magsasaka,
Magkatuwang sa ginhawa"

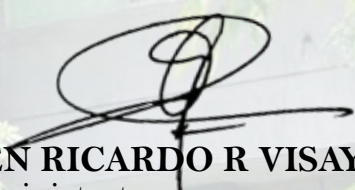

Greetings!

For over fifty (50) grateful years of service to Filipino people, the National Irrigation Administration (NIA), thru Public Affairs and Information Staff (PAIS), dedicates this special edition of NIA Digest to all who stand alongside with us to continuously build not only irrigation systems and dams but more so the partnership, trust, and commitment.

Prinsa serves as a master plan in which we can see what the agency has done and what are the things that need to be done for our farmers and other stakeholders. This special edition is timely as the current administration prioritizes infrastructure as a key to continued development of the country. The “Build, Build, Build” initiative of President Rodrigo Roa Duterte will pave the way to improved irrigation systems which directly impact a bountiful harvest leading to improved lives of Filipino farmers.

As we continuously build dams, we believe that we are also continuously building the dreams of every Filipino farmer; as we provide sufficient water to our agricultural lands, we likewise provide the country an opportunity to be a food self-sufficient nation in the years to come.

NIA CAR

Cordillera Administrative Region

NIA-CAR was created in 1993 and covers the provincial irrigation offices of Abra, Benguet, Ifugao, Kalinga-Apayao, Mountain Province, and Upper Chico River Irrigation System which were previously under NIA-Regions 1 and 2. With the implementation of the NIA Rationalization Plan, NIA-CAR now covers Kalinga IMO, Apayao IMO and the Abra-Benguet-Ifugao-Mountain Province Irrigation Office which is currently under the direct supervision of the regional office located in Wangal, La Trinidad, Benguet.

NIA-CAR covers three national irrigation systems (NIS), namely, the Upper Chico River Irrigation System (UCRIS) with service areas in Kalinga and Isabela, West Apayao-Abulug Irrigation System with service areas in Apayao and Cagayan, and Hapid Irrigation System in Ifugao, and 1,376 NIA-assisted communal irrigation systems (CIS) all over the region. There are 921 irrigators associations in NIA-CAR with about 67,000 farmer-members.

REGION 1

Ilocos Region

With a total service area of 113,000 hectares, NIA serves more than 84,000 farmers in Region I. Of these, 51,754 belong to 262 registered irrigators associations (IAs) that look after 63,124 hectares under the national irrigation system (NIS).

The remaining 32,685 are members of 35 registered IAs responsible for another 48,476 hectares supplied by the communal irrigation system (CIS).

REGION 2

Cagayan Valley

Region II has 16,426 irrigation systems that cover 268,216 hectares of agricultural lands. National irrigation systems (NIS, which cover 1,000 hectares and above) make up 56.75 percent of the command area while communal irrigation systems (CIS, covering less than 1,000 hectares) serve 44 percent of the irrigation area.

Cagayan Valley covering the entire area occupied by Cagayan province, the Batanes group, Isabela, Nueva Vizcaya, and Quirino, Region II produced a total of 2.177 million metric tons of palay and 1.875 million of corn in 2012. On average, the region provides 13 percent of the country's palay and 22 percent of the national corn supply.

MARIIS

Magat River Integrated Irrigation System

The Magat River Integrated Irrigation System (MARIIS) is one of the largest irrigation projects undertaken by the National Irrigation Administration at a cost of P3.4 billion. It consists of the Magat Reservoir; two diversion dams namely the MARIS Dam and the Baligatan Diversion Dam; a large number of irrigation canals; and three pumping stations to supply irrigation water for an area of 97,402 hectares.

Officially opened in 1986, MARIIS serves 17 towns and two cities in the province of Isabela, three municipalities in Quirino and the municipality of Alfonso Lista in Ifugao. It also includes the 360 MW Magat Hydro Electric Power Plant and the 6 MW Baligatan Hydro Electric Power Plant, as well as the 2.5 MW mini-hydro-electric power plants operated by the Isabela Electric Cooperative (ISELCO) and located along the MARIS Main Canal.

REGION 3

Central Luzon

Region III comprises seven provinces in the central plains of Luzon, namely, Aurora, Bataan, Bulacan, Pampanga, Nueva Ecija, Tarlac, and Zambales. It has a total land area of 2,147,035 hectares. About 30 percent of the total land area estimated at 644,475 hectares is devoted to agricultural production. NIA Region III is tasked with providing irrigation services to 58.2 per cent of the agricultural lands of Central Luzon.

Nine offices were clustered into three irrigation management offices (IMO). The provincial offices of Bulacan, Aurora, and Nueva Ecija were merged to create the BANE IMO; the Pampanga, Bataan, Pampanga Delta RIS, and Colo Caulaman RIS comprise the PAMBAT IMO; and the Tarlac, Camiling RIS, Zambales, and Nayum Bayto RIS make up the TARZAM IMO. The regional office is based in Barangay Tambubong, San Rafael, Bulacan.

UPRIIS

Upper Pampanga River Integrated Irrigation System

UPRIIS is one of NIA's most viable irrigation systems, servicing more than 122,000 hectares of agricultural lands in Central Luzon from its main source, the Pantabangan Dam.

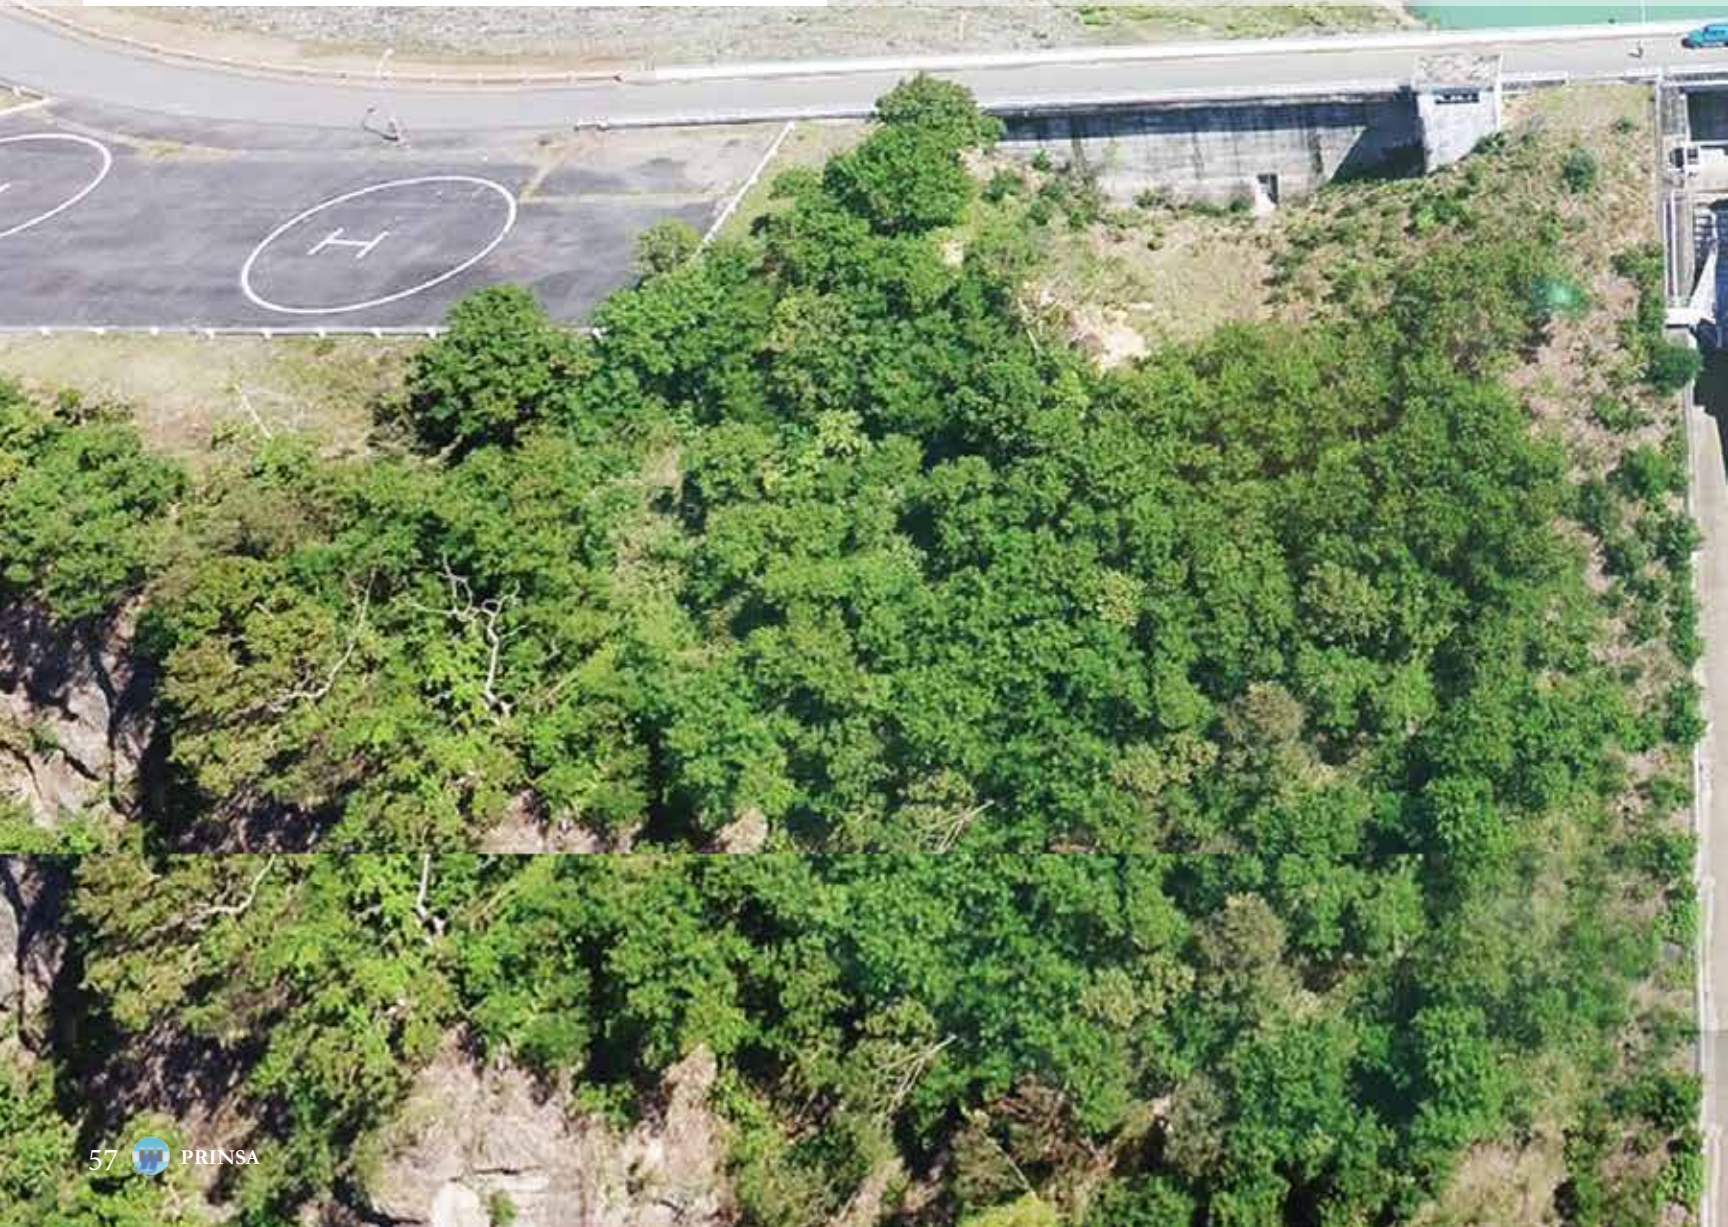

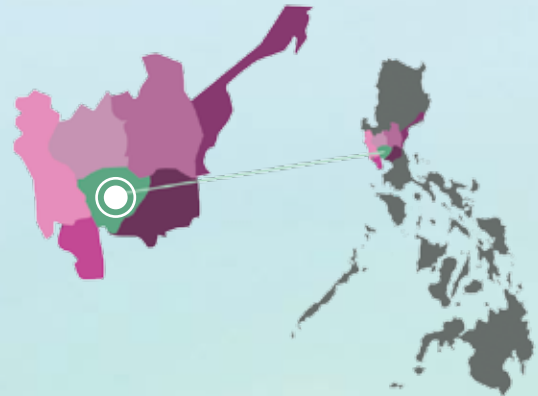

An all-Filipino consortium of engineers started the dam construction in 1971 and completed it 17 months ahead of schedule. It was inaugurated on September 7, 1974. The feat led Amnon Golan, chief of IBRD for Far East & Pacific Project of the World Bank to dub NIA as "the finest irrigation agency in the whole of Asia and in any developing country in the world." When the project started its operation, it became officially known as the Upper Pampanga River Integrated Irrigation Systems (UPRIIS).

UPRIIS has a total service area of 122,320.05 hectares divided into five irrigation divisions encompassing the provinces of Nueva Ecija (105,674.76 hectares), Bulacan (6,250 hectares), Tarlac (1,719.5 hectares), and Pampanga (4,324.52 hectares). The system benefits 84,830 farmers who are members of 401 irrigators associations (IAs). UPRIIS coddles a watershed area of 90,900 hectares.

Region 4A

CALABARZON

In 2002, Executive Order 103 divided Region IV into CALABARZON Region IV-A and MIMAROPA Region IV-B. The formal separation of NIA-Region IV was adopted by the NIA board in March 2011.

Region IV-A has retained jurisdiction on Laguna-Rizal IMO, Cavite-Batangas IMO, and Quezon IMO. Also known as Calabarzon, Region IV-A is formally called the Southern Tagalog Mainland. It consists of five provinces from which the acronym Calabarzon was taken: Cavite, Laguna, Batangas, Rizal, and Quezon. The region is located just south and east of Metro Manila, and is the second most densely populated region in the country.

REGION 4B

MIMAROPA

To accelerate the social development of the provinces and cities comprising Region IV, Executive Order 103 dated May 17, 2002 divided the region into Region IV-A (CALABARZON) and Region IV-B (MIMAROPA). Adopting the provision of the executive order, NIA created a separate regional office called Region IV-B in 2011.

The office has a total firmed-up service area of 49,169 hectares, with an operational area of 36,907 hectares capably managed by 118 irrigators association under the national irrigation system and 237 under the communal irrigation system.

Region 5

Bicol Region

NIA Region 5 covers the six provinces of Camarines Norte, Camarines Sur, Albay, Sorsogon, and the islands of Catanduanes and Masbate. The Bicol region has a potential irrigable area of 239,660 hectares, some 124,350 hectares of which have already been provided with irrigation service by eight national irrigation systems (NIS), 319 small-scale communal irrigation systems (CIS), pump irrigation systems (PIS), and those privately owned and constructed by other government agencies.

REGION 6

WESTERN VISAYAS

Region VI or Western Visayas is composed of the four provinces of Panay (Aklan, Antique, Capiz, and Iloilo), Guimaras Island, and the western portion of the island of Negros and its outlying islands. Its boundaries are the Visayan Sea on the east, the Cuyo East Pass on the west, the Sibuyan Sea and Romblon on the north and the Cagayan Island on the southwest.

NIA Region VI is based in Tacas, Jaro, Iloilo City. The total area covered by national irrigation systems is 46,752.64 hectares serviced by 164 irrigators associations (IA) with 25,806 members. Communal irrigation systems (CIS) cover 22,613.94 hectares serviced by 275 IAs with 23,738 members.

REGION 7

CENTRAL VISAYAS

Central Visayas already had a total of 25,910 hectares of irrigated rice land. The completion of the Bayongan Dam of the Bohol Irrigation Project Stage II in October 12, 2007 increased irrigated lands to 40,410 hectares.

With the potential to develop another 28,181 hectares in Central Visayas and with the provincial government of Bohol offering an office compound in Tagbilaran, Bohol, the NIA board adopted Resolution No. 7567-09 in February 23, 2009 establishing a regional irrigation office based in Bohol. NIA Region VII comprises the provinces of Bohol, Cebu, Negros Oriental, and Siquijor

REGION 8

EASTERN VISAYAS

NIA Region 8 or the Eastern Visayas region covers the provinces Leyte, Biliran, Southern Leyte, Samar, Eastern Samar, and Northern Samar. There are eight national irrigation systems (NIS) in the region with a total service area of 19,849 hectares that directly benefit 18,191 farmers, 10,369 of which are members of irrigators association (IA).

The regions NIS are all located in Leyte. The communal irrigation system (CIS), on the other hand, cover 33,200 hectares on which 23,562 farmers depend, 17,106 of these are IA members.

REGION 9

ZAMBOANGA PENINSULA

Located in the western part of Mindanao, NIA Region IX, also called the Zamboanga Peninsula, is composed of Zamboanga del Sur, Zamboanga del Norte, Zamboanga Sibugay, and Zamboanga City, with the provinces of Basilan, Sulu, and Tawi-Tawi under ARMM.

Most of the major irrigation systems and dams of the region are located in Zamboanga del Sur: the Dipolo RIS in Dumingag (1,600 hectares), the Salug RIS in Molave (7,224 hectares), the Labangan RIS in Labangan (3,195 hectares), and the Sibuguey valley irrigation system in Bayog (3,143 hectares). They service a total of 15,162 hectares across the province.

REGION 10

Northern Mindanao

NIA Region X became a regional office on April 1, 1978, when Region VIII-A was renamed Region X. With the regional seat in Cagayan de Oro City, the region covers seven provinces and seven cities in Northern Mindanao, namely, Agusan del Norte, Agusan del Sur, Bukidnon, Camiguin, Misamis Oriental, Misamis Occidental, and Surigao del Norte.

With the creation of CARAGA Region or Region XIII in May 1996, the four big provinces of Agusan del Sur, Agusan del Norte, Surigao del Sur, and Surigao del Norte with all their national irrigation systems (NIS) and communal irrigation systems (CIS) were taken out of NIA Region X. Therefore, the region is now composed of the six provinces of Misamis Occidental, Misamis Oriental, Camiguin, Bukidnon. Lanao del Sur and Lanao del Norte from Region XII joined through the mandate of NIA in 2002.

REGION 11

Davao Region

NIA Region XI is strategically located within the heart of Mindanao. It is the most visited region and named the fruit basket of the Philippines. It has a total land area of 1,967,382.00 hectares, of which 110,362.00 are considered potential areas for irrigation development. There are 64,421 hectares already being served by existing irrigation systems.

At present, NIA Region XI operates and maintains eight NIS and 84 CIS under four responsibility centers which cover Davao and Compostela Valley.

Region 12

SOCCSKSARGEN

Region 12 is composed of North Cotabato, Sultan Kudarat, and Maguindanao (from the defunct Region VIII-A) and Lanao del Norte and Sur (from the defunct Region VII). In 1995, another Mindanao Region (CARAGA) was created by virtue of Republic Act 7901. This law also provided for the transfer of Sultan Kudarat province to Region XI. Thus, Sultan Kudarat PIO together with Lambayong and Tacurong Rivers irrigation system were transferred to NIA Region XI. However, the same offices were returned to NIA Region XII on July 1, 2000.

In July 2002, by virtue of NIA Memorandum Circular, South Cotabato and Sarangani were transferred to Region XII from Region XI and Lanao del Sur and Norte were transferred to Region X from Region XII.

REGION 13

CARAGA

The NIA-Caraga Region is composed of five provinces, namely, Agusan del Sur, Agusan del Norte, Surigao del Sur, Surigao del Norte, and Dinagat Islands. It has five component cities and one chartered city of Butuan, known as the economic hub of the region.

The total potential irrigable area is 173,391 hectares while the irrigated area is 60,000 hectares. It has eight national irrigation systems (NIS) with a combined area of 29,544 hectares. It has also 133 communal irrigation systems (CIS) covering 20,897 hectares. Farmer beneficiaries are 16,180 for NIS and 24,365 for CIS
